

SUNIL SHARMA

Data Analyst

Gwalior, India — +91 7489085169 — sunilsharma01220122@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 1+ year of experience in data collection, cleaning, validation, analysis, dashboard development, and business reporting using SQL, Excel, Power BI, and Python. Skilled in KPI tracking, MIS reporting, exploratory data analysis, Power Query, DAX, reporting automation, and transforming raw data into actionable insights for business decision-making.

SKILLS

Programming & Querying: SQL, Python, DAX, PySpark

Databases: SQL Server, MySQL, Azure SQL

BI & Reporting: Power BI, Advanced Excel, Power Query, Pivot Tables, Dashboard Development

Data Analysis: Data Cleaning, Data Validation, EDA, KPI Tracking, Trend Analysis, MIS Reporting

Data Engineering & Platforms: ETL, Azure Data Factory, Azure Databricks, Azure Data Lake Storage, GitHub

PROFESSIONAL EXPERIENCE

Data Analyst

Mar 2024 – Mar 2025

Repro Book Limited, Noida — **Tools Used:** Excel, SQL, Power BI

- Collected, cleaned, and validated 10,000+ business records using Excel and SQL, improving data accuracy and reporting reliability for management reports.
- Built Power BI dashboards to track sales, inventory, vendor performance, and 10+ operational KPIs, helping management monitor business performance in one place.
- Automated weekly and monthly MIS reports using Excel formulas, Pivot Tables, and structured reporting templates, saving 5 hours per week in manual reporting work.
- Performed SQL- and Excel-based trend analysis to identify reporting gaps, operational patterns, and KPI changes for daily and weekly business reviews.

PROJECTS

Order Delivery Performance & SLA Analysis — [GitHub](#)

Tools Used: Excel, SQL Server

- Cleaned 99,441 e-commerce order records across 4 datasets using Excel formulas such as IF and DATEDIF, standardizing SLA logic for on-time versus late delivery analysis.
- Loaded 112,650+ records into SQL Server and wrote 15 KPI queries using JOINS, aggregations, filters, and conditional logic for multi-table analysis.
- Identified a 91.9% on-time delivery rate, 12-day average delivery time, BRL 13.2M in total sales, and Maceio as the highest-risk city with a 29.7% late delivery rate.

Global Population Forecast Analytics Dashboard

Tools Used: Power BI, DAX, Power Query

- Integrated 3 CSV datasets covering 1M+ rows across 201 countries and 150 years into a clean Power BI model using Power Query for structured analysis.
- Developed DAX measures for population totals, country ranking, regional distribution, forecast change, and decade-wise growth analysis.
- Designed interactive Power BI pages with KPI cards, maps, slicers, bookmarks, tooltips, and navigation buttons to improve dashboard usability and insight discovery.

Retail Sales Dashboard — [GitHub](#)

Tools Used: Excel

- Built an interactive Excel dashboard using Pivot Tables, slicers, and conditional formatting to track sales, profit, and category-wise performance.
- Analyzed 828 orders across 4 years of data, summarizing \$1.88M in total sales and \$332K in total profit across regions and product categories.

AWARDS & CERTIFICATIONS

- SQL Certificate – HackerRank, 2025 — [Link](#)
- Intro to Data Analysis with Python – CodeSignal, 2025 — [Link](#)
- Introduction to Programming with Python – CodeSignal, 2025 — [Link](#)

EDUCATION

Bachelor of Science (B.Sc.)

2019 – 2022

Institute of Hotel Management, Gwalior
